

Congratulations, you have passed!

We are pleased to confirm that your project has achieved a 'pass' rating and the Air Leakage Test complies with Part L Regulations.

Reports:

For each building tested, we have attached a Report pack consisting of;

1. A 'PASS' certificate for the test (A4 Landscape)
2. A 'Pass' report front sheet
3. A copy of the Test Report for each building

Items '1' and '2' apply to each building and report. Item '3' is individual to each test carried out.

From the attachments, all items can be saved or forwarded electronically, or printed to hardcopy. We suggest you forward copies of the reports to your Building Control Officer/Accredited Inspector and to your Client/buyer

You can find the actual Test result on page 2 of the Report (highlighted by the arrow); it appears as a duplicate figure in the 'air leakage' and 'air permeability' categories.

The Air Leakage Test has been performed in accordance with ATTMA TS1 and the BINDT quality procedure, Test Method B.

For your next project:

Energist UK specialise in Air Testing, also

SAP and SBEM

Ecohomes

Code for Sustainable Homes

Breem

Energy Performance Certificates

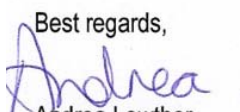

For your next project we can complete your SAP or SBEM Calculations within 48 hours and pre-book your Air Leakage Test at the same time. You can also book on-line.

Future proof:

We understand you probably don't have time to keep up to date with all the Building Regs changes. Don't worry; we will do that for you! Unless you tell us not to, we will email or write to you with the latest changes. On this occasion, we have included details on the new legislation - Code for Sustainable Homes – which is mandatory from May 2008 in England. For more details, please visit our website or call our Pricing Team on 0845 8 386 387 for valuable advice and a Quotation.

A personal note:

We are fanatical about customer service and hope you are pleased with the service we have provided. We very much look forward to working with you again.

Best regards,

Andrea Lowther
